TVOSECOPS: Trend Vision One™ Security Operation (SecOps) Professional

Courses Code: TVOSECOPS
Duration: 3 days
Instructor-led Training (ILT) | Virtual Instructor-led Training (VILT)

Courses Overview

Trend Vision One™ Security Operation (SecOps) Professional

Trend Vision One is a powerful cybersecurity platform that helps organizations stay ahead of evolving threats. This surpasses conventional endpoint protection by incorporating Security Operations (SecOps). To deliver a complete picture of potential attacks, SecOps within Trend Vision One integrates data from various sources, including endpoints, email, servers, cloud environments, and networks. This approach accelerates the detection, investigation, and response to threats, catching advanced attacks that might bypass traditional security solutions.

This intensive three-day, instructor-led course provides certified professionals with the knowledge and hands-on experience to master Trend Vision One's SecOps capabilities. You will delve into the concepts of Security Operations, learn how to connect Trend Micro and third-party products, install SecOps sensors, navigate workbenches, incorporate threat intelligence, search the data lake, and automate responses using Security Playbooks. Through a combination of expert instruction and hands-on lab exercises, you will gain the practical skills necessary to effectively utilize Trend Vision One for comprehensive threat detection, investigation, and response.

Skills Covered

- Describe the benefits of an XDR solution, including its ability to provide comprehensive visibility, improve detection and response capabilities, and reduce complexity.
- Connect Trend Micro products to Trend Vision One to collect telemetry data and enable centralized management.
- Collect telemetry from endpoints, email, the web, and the network to gain insights into potential security threats.
- Integrate third-party products with Trend Vision One to expand its capabilities and provide a more holistic view of the security landscape.

Japan | Australia | Brazil | Canada | Colombia | Dominican Republic | India | Indonesia | Malaysia | Mexico
Philippines | SEANM | Singapore | South Korea | Thailand | UAE | United Kingdom | USA | Vietnam

global.marketing@trainocate.com

- Interpret and navigate within Workbenches to analyze security events, identify anomalies, and investigate potential threats.
- Use the Search tools to locate information in the data lake, including historical data and threat intelligence.
- Create Playbooks to streamline response activities, automate tasks, and improve the efficiency of security operations.

Who Should Attend?
N/A

Prerequisites
N/A

Modules

- XDR Concepts
- Trend Vision One
- Connecting Trend Micro Products
- Integrating with Third-Party Products
- Using the XDR Apps
- Sharing Threat Intelligence
- Searching the Data Lake
- Responding to Incidents Using Security Playbooks
